ail was verified.

What do you want to do first?

Every developer needs to configure their environment, so let's get your GitHub experience optimized for you.

Start a new project
Start a new repository or bring over an existing repository to keep contributing to it.

Create a repository

Collaborate with your team
Improve the way your team works together and get access to more features with an organization.

Create an organization

Learn how to use GitHub
Get started with an "Introduction to GitHub" course in our Learning Lab.

Start Learning

[Skip this for now >](#)

Create a new repository

A repository contains all project files, including the revision history. Already have a project repository elsewhere? [Import a repository.](#)

Owner *

tombap2021

Repository name *

/ mysite

Great repository names are short and memorable. Need inspiration? How about [curly-octo-meme?](#)

Description (optional)

나의 포트폴리오 사이트 개발소스

Public

Anyone on the internet can see this repository. You choose who can commit.

Private

You choose who can see and commit to this repository.

Initialize this repository with:

Skip this step if you're importing an existing repository.

☐ Add a README file

This is where you can write a long description for your project. [Learn more.](#)

☐ Add .gitignore

Choose which files not to track from a list of templates. [Learn more.](#)

☐ Choose a license

A license tells others what they can and can't do with your code. [Learn more.](#)
